CSS Class Type

Module

- **header**
- **footer**
- **contents**
- **mainLogo**
- **title**
- **column**
- **thumbnailList**
- **textList**
- **detailBox**
- **modalWindow**

Multi Class (object-oriented)

CSS Class Type

Skin

- red
- blue
- wide
- high
- low
- stripe
- subdued
- small
- middle

Multi Class (object-oriented)

CSS Class Type

1
2
3

Number

- one
- two
- no[nth]
- type[nth]
- first
- last
- odd
- even

Multi Class (object-oriented)

CSS Class Type

State

- **active**
- **disable**
- **tapped**
- **success**
- **error**
- **highlight**
- **checked**
- **note**
- **center**
- **right**

Multi Class (object-oriented)

CSS Class Type

Other

- **wrap**
- **Service name**
- **Page name**
- **Controller name**
- **Namespace**

ATOMIC PARTS BASE CSS(APB CSS)

Directory structure

Directory structure

SCSS Directory

SCSS

```
scss
|- base
|- pages
|- parts
_common_inc.scss
_parts.scss
style.scss
```

- **_common_inc.scss**: import base and pages
- **_parts.scss**: import parts files

Directory structure

Base Directory

base

```
scss
|- base
  |- _base.scss
  |- _mixin.scss
  |- _reset.scss
  |- _setting.scss
```

- **_base.scss**: Define -based style of application
- **_mixin.scss**: Define mixin style
- **_reset.scss**: Initialize the style
- **_setting.scss**: Define such as variables and prefix

Directory structure

Parts Directory

parts

```
scss
|- parts
|- _button.scss
|- _icon.scss
|- _list.scss
|- _paragraph.scss
....
```

File group that defines the atom and modules.

Directory structure

Pages Directory

pages

```
scss
|- pages
  |- _top.scss
  |- _info.scss
  |- _profile.scss
  |- _main_contents.scss
  ....
```

Defines page-specific layout style.

Directory structure

Name Space

HTML

```
<section id="top" class="top">
```

ID is the controller name(pages Directory name)

The class name is the action name, provide a name space.
